

Program of XD107 seminar in the Fall semester 2016
Friday February 10, 2017 A11-132

Time		
8:00 - 8:15	Registration	Sign attendance sheet in A11/132. Pin up posters in Hallway between A14 and A11, 2nd floor
8:15 - 8:30	Opening	A11/132
	Lectures part I	
8:30	Michaela Hylsová	New biologically active compounds based on pyrazolo[1,5-a]pyrimidine and its isosteres
9:00	Marta Seifertová	small amounts of biological material from human cohorts and in vivo tests
9:30	Eliška Čechová	Developmental neurotoxicants: The advancement of multi-residue screening for analytical determination and their occurrence in human matrices
10:00	Ondřej Hylse	Fully synthetic route to forskolin and development of strategies for analog preparation
10:30	Kateřina Coufalíková	Multiple Hyphenation of LC with ESI MS, MALDI MS and SALD ICP MS – The Detection Platform for Metalloproteomics Studies
11:00	Mária Chropeňová	Air quality assessment by using pine needles and moss
11:30	Marek Martínek	Photoactivatable Compounds
12:00 - 13:00	Break	
13:00 - 14:30	Posters	Hallway between A14 and A11, 2nd floor All poster authors present at their posters
	Lectures part II	
14:30	Miroslav Brumovský	Emerging Contaminants in Remote Marine Waters
15:00	Kristína Sleziačková	New macrocycles for selective binding of ions
15:30	Pavλίna Karásková	Perfluorinated Compounds in Environmental Matrices
16:00	Ján Podhorský	Synthesis of Molecular Precursors of Phosphates and Oxides of Metals and their Processing into Materials
16:30	Eva Kedroňová	Composite materials made of electrospun polymer nanofibers coated by plasma-chemical deposited layers: Preparation and
17:00 - 18:30	Posters	Hallway between A14 and A11, 2nd floor All poster authors present at their posters. Beer will be served.
18:30 - 19:00	Best Lecture Award, Best Poster Award, Conclusion	A11/132
