

Opakování I_řešení

1. Navrhněte syntézu; využijte zadané výchozí látky:

2. Doplňte reakční podmínky a produkty. Uvažujte stereochemii.

3. Navrhněte syntézu:

4. Doplňte hlavní produkty včetně stereochemické konfigurace:

5. Která z molekul **A** a **B** bude rychleji reagovat s HBr a proč? Která z molekul **C** a **D** bude reagovat rychleji s MCPBA a proč?

A

B

C

D

stabilnější karbokation

lepší nukleofil

6. Navrhněte mechanismus:

7. Navrhněte syntézu:

8. Navrhněte mechanismus:

11. Navrhňte syntézu:
