

We invite you to the Zoological seminar

Presentation of dissertation topics

Viktorie Klobušická: Integrative taxonomic revision of selected Holarctic Planorbidae snails: an exploration of local endemism in ancient Balkan lakes

Emma Laval: Study of selective mechanisms allowing the function of the immune system in fish hybrids: implications to the parasite and commensal organisms

Petr Mrhálek: Metabolic and behavioral aspects of bat hibernation

Barbora Pavlíčková: Diversity, biogeography, and speciation processes in arid-adapted rodents

Andrea Quattrocolo: Predatory functionality of prey-specific spider venoms

Rio Shida: Trophic Adaptation in Specialized Spiders

"I love never finishing our dissertations together."

2 October 2025, 1 p. m.

Room B11/306, University Campus Bohunice,
Kamenice 5, Brno-Bohunice
