

DEFENCE PROCESS

Bachelor's thesis topic:

The Impact of Central Bank Digital Currency on Economic Policy

Bachelor's thesis supervisor:

Mgr. Ing. Ondřej Špetík, Ph.D. (KEK ESF MU), Department of Economics

Bachelor's thesis reviewer:

Ing. Jan Jonáš, Ph.D. (KEK ESF MU), Department of Economics

Description of the course of Bachelor's thesis defense - **regular examination date:**

The student presented their Bachelor's thesis „The Impact of Central Bank Digital Currency on Economic Policy“. The student summarized the aim, the methods used, the results, contributions and limitations of the work. The student presented their bachelor thesis using a powerpoint presentation, it was well prepared, presented, and on time.

Subsequently, the reviews of the supervisor and the reader were heard. The chairman of the committee invited the student to comment on the reviews and to answer selected questions from the reviews, namely the questions 1 and 2 of the supervisor. The student responded sufficiently.

The following questions were also raised during the discussion of the thesis: Did the results of the literature differ between the literature using formal modelling/ simulations compared to those who don't?; You used your own measure for the selection criteria for the literature? How did you develop it and why didn't you use the existing measures of the financial literature?; Do you think there will be an attempt to introduce CBDC somewhere in the world soon? The student responded sufficiently.

Evaluation: **passed with excellent results**
